Driving efficiency

Fringe Benefits Tax management solution designed and developed in Australia and supported by ATO class ruling (CR2015/60).

What is eelogbook®?

eelogbook® is an ATO compliant FBT tool that replaces and automates old fashioned, time-intensive, paper-based vehicle logbooks. It collects your trip data via a telematics device installed in the vehicle and conveniently sends it to you via email or the eelogbook® app after each trip. You can easily select a trip reason from pre-defined options for accurate record-keeping.

Why use eelogbook®?

eelogbook® assists companies to determine Fringe Benefits Tax (FBT) liability for employer-provided cars. Employees simply record private or business against each trip, and eelogbook® automatically calculates the percentages of private and income-producing use. Applying the private use percentage to the car's annual operating expense determines the taxable value and FBT amount for submission to the ATO annually by March 31st.

What are the benefits?

eelogbook® brings significant tax savings to employers and time savings to employees. Employers often make conservative estimates due to administrative burdens, leading to overpaid taxes. With eelogbook®, employees only need to specify business or private travel, and eelogbook® automatically handles the rest.

We're here to help
